

Northwind Supplies — Support Playbook

Escalation levels

Tier 1 handles password resets, order status, and delivery tracking. Anything Tier 1 cannot close within 15 minutes moves to Tier 2.

Tier 2 handles billing disputes, faulty goods, and account merges. Tier 2 has authority to issue goodwill credit up to 50 pounds without approval.

Tier 3 is engineering. Only Tier 2 may escalate to Tier 3, and only with a reproducible case attached.

Response targets

First response within 4 working hours. Resolution within 2 working days for Tier 1, and 5 working days for Tier 2.

Out-of-hours cover

The on-call rota runs 18:00 to 08:00 on weekdays and covers weekends in full. Only severity-one incidents wake the on-call engineer.

A severity-one incident is a total checkout outage, a payment provider failure, or any confirmed data exposure. Everything else waits for the next working day.

Refund authority

Support agents may approve refunds up to 200 pounds. Above that, a team lead must co-sign. Refunds over 1000 pounds require finance approval and are processed in the weekly batch on Fridays.
